Introducing Portability To 2-Channel FFT Analysis

Our new CF-350 is half the size and weight of today's 2-channel FFT's. Enabling you to use it inside automotive vehicles, aboard submarines and helicopters, and for many other field measurements.

It is a full-function analyzer. With large internal memory so you won't need hardcopy recorders in the field.

The CF-350 also offers a wide choice of options. So you can define the most cost-effective analyzer to meet today's

needs. Yet have the ability to expand it as your needs grow.

Call us today to receive our new 20-page CF-350 brochure. Discover why Ono Sokki's family of FFT's is your best buy.
